

THRIENDS NFT

Thriends' NFT collection was carefully crafted between mid-April and November 2023. The entire collection showcases custom-designed artwork that took over 1,500 hours to complete.

Whitepaper

Storyline:

I have had a passion for web designing since my childhood and have been building websites since the age of 14. Despite growing up in a tough neighborhood, I never let go of my passion. Life in my neighborhood was far from easy and was plagued by the realities of street life. I have moved on from that life, but I always remember the friends who didn't make it. May they rest in peace, and for those still on the streets, I hope they find their way.

Thriends was originally created as Street kids in honor of fallen friends. At first, the project was kept private and not shared on social media. However, when Threads was launched, I decided to give it a try. It was on Threads where I met some amazing people and made lasting connections. As a result, I chose to re-brand the project from StreetKids to Thriends. Today, Thriends has a large follow count and continues to grow.

How It Works:

Thriends are stored on the Ethereum blockchain.

Contract ERC721: `0x324706Edc0490eCBcD0db41D4e779913cC7f4cf1`.

To purchase a Thriends NFT, you need an active ETH wallet, like Metamask, and available funds to process the purchase. The fixed mint price for a Thriends NFT is 0.02 ETH. The smart wallet has been set up to reduce gas fees, so whether you purchase one or five NFTs, your gas fee will remain the same.

Thriends does not control the gas fees and takes no responsibility for them. The gas fee is set by the ETH Blockchain and paid by the investor.

Follow the steps below to get yourself a Thriend.

Step 1: mint.thriends.io

Step 2: Install Metamask

Step 3: Purchase ETH (You can top up your wallet with ETH directly through

METAMASK) Step 4: Purchase SKT NFT (Your minted thriends will be available in your MM.Wallet instantly and ready for trading on our official Opensea and

Magiceden MP.

Social Media:

Thriends engages with the community on other platforms, but we suggest following our Threads account to stay up-to-date on our upcoming events.

Ecosystem:

Thriends is an exciting new project that is just starting out. It offers Thriends Token (TT) to those who hold SKT, and you can earn Thriends meme tokens as a reward by staking your Thriends NFT. The launch of Thriends meme token is expected to take place next year (2024), so keep an eye out for it! Currently, the staking rate is set at a high rate of 0.3 TT per second, which means that you can earn a lot of tokens quickly. However, as more people start holding NFTs, the staking rate will gradually decrease. The current supply of TT Meme tokens is 1.45 billion, with 300 million locked in for SKT Holders. So, if you're interested in earning some Thriends meme tokens, make sure to stake your Thriends NFT soon!

THRIENDS TOKEN

Thriends token was created to award Thriends NFT Holders. Thriends is a community-driven project owned and operated by Threads influencer NFTStreetKid.

MISSION:

We are excited to announce that the Thriends project is in its initial stages and we are confident that it will be a great success. Since the Thriends token is a community-driven project, we are exploring ways to enhance its utility as we progress. We are determined to add remarkable features to provide a meaningful purpose for our token holders to hold and trade Thriends tokens.

Some of the features we are currently looking at:

M1: Launch token on a trading platform.

M2: Thriends Toys

M2: Thriends online shop (Purchase available with T.Token)

M3: Web 3 gaming app (Earn and trade items with T.Token)

TOKENOMICS:

\$TT Token Will drive Thriends movement towards domination. Join the Threaded community and seize victory with us if you want to be Thriends.
